1	MAGNA3 50-120 F	 <p>Uzmanību! Izstrādājuma attēls var atšķirties no faktiskā izstrādājuma izskata.</p> <p>Izstrādājuma Nr.: <a href="#">97924291</a></p> <p><b>MAGNA3 – More than a pump</b> With its unrivalled efficiency, all-encompassing range and built-in communication capabilities plus functionalities replacing system components, the MAGNA3 is ideal for engineers and specifiers looking to create high-performance systems for buildings.</p> <p>This pump in the Grundfos Master Class will fit both heating and cooling applications perfectly, making it the obvious choice for almost any building project – old or new.</p> <p>The MAGNA3 is of the canned-rotor type, i.e. pump and motor form an integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid.</p> <p>The innovative clamp with only one screw enables easy repositioning of the pump head.</p> <p>The MAGNA3 is a pump with no maintenance requirements and with extremely low Life Cycle Cost.</p> <p>The pump is characterised by the following:</p> <ul style="list-style-type: none"><li>• controller integrated in the control box</li><li>• control panel with TFT display on the control box</li><li>• control box prepared for optional CIM modules</li><li>• built-in differential-pressure and temperature sensor</li><li>• cast-iron pump housing (depending on model)</li><li>• carbon-fibre-reinforced composite rotor can</li><li>• stainless-steel bearing plate and rotor cladding</li><li>• aluminium alloy stator housing</li><li>• air-cooled power electronics</li></ul> <p>The MAGNA3 is a single-phase pump.</p> <p><b>Characteristic features</b></p> <ul style="list-style-type: none"><li>• AUTOADAPT.</li><li>• FLOWADAPT and FLOWLIMIT (more than a pump function as it reduces the need for pump throttling valves).</li><li>• Proportional-pressure control.</li><li>• Constant-pressure control.</li><li>• Constant-temperature control.</li><li>• Constant-curve duty.</li><li>• Max. or min. curve duty.</li><li>• Automatic Night Setback.</li><li>• No external motor protection required.</li><li>• Insulating shells supplied with single-head pumps for heating systems.</li></ul>

- Large temperature range where the liquid temperature and the ambient temperature are independent of each other.

#### Communication

The MAGNA3 enables communication via the following:

- wireless Grundfos GO Remote
- fieldbus communication via CIM modules
- digital inputs
- relay outputs
- analog input (more than a pump function as heat energy meter)

#### Motor and electronic controller

The MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This motor type is characterised by higher efficiency than a conventional asynchronous squirrel-cage motor.

The pump speed is controlled by an integrated frequency converter.

A differential-pressure and temperature sensor is incorporated in the pump.
