Grundfos Conlift1 are condensate removal pump solutions designed for pumping of condensate that is collected below sewer level or which cannot flow to the sewage system or drain of the building by means of a natural downward slope.

The solutions are suitable for the pumping of condensate from air-conditioning systems, cooling and refrigeration systems, air dehumidifiers and evaporators.

It is also suitable for condensate boilers and condensate with a pH value above 2.5.

For condensate with a pH value below 2.5, we offer the pH+ box neutralisation unit as accessory.

Features and benefits:

- Fully sealed against moisture and evaporation.
- Quick and easy installation.
- Very silent and smooth operation.
- Can be mounted on the floor or on a wall.
- Pre-assembled non-return valve.
- Pump operation test button.
- Incorporates high-water float switch.
- Fully automatic operation.
- Inlet and discharge hose connectors included.
